ACADEMIC PROJECTS AND INDUSTRY PROJECT

Ongoing Cryptography With Double Key Encryption (Degree) — *.Net ,XML, WPF*

IIn this project, we propose an idea of double encryption technology. In that, the idea begins with the traditional methodology of encrypting of the data which is more useful and harmful if not secure. So after the first encryption, we will again encrypt the same file with another method of encryption.

Domain Name Generator WordPress Plugin — *React JS, Node JS, Express, Custom Rest API*

I have created a custom domain name generator and business name finder

WordPress plugin. The main objective is to suggest the name of any un acquired domain or the business name based on the algorithm and data.
